This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

The Gift
of
Francis Bowen,
of
Cambridge
Rec'd. Nov 7. 1846

Francis Bowen, Esqr
with the respects of
Charles Wm. Bradley
Secretary of the State.
Sept. 8. 1846.

STATISTICS

OF THE

CONDITION AND PRODUCTS OF CERTAIN

BRANCHES OF INDUSTRY

IN CONNECTICUT, — Sec. of State

FOR THE YEAR ENDING OCTOBER 1, 1845.

PREPARED FROM THE RETURNS OF THE ASSESSORS

BY DANIEL P. TYLER,

SECRETARY OF STATE.

HARTFORD:
PRINTED BY JOHN L. BOSWELL,
STATE PRINTER.
1846.

ADVERTISEMENT.

THERE are in the State of Connecticut one hundred and forty-four towns, with a population, in the year one thousand eight hundred and forty, of three hundred ten thousand and fifteen.

As no means had been recently adopted by the Legislature by which the value of the agricultural products, or the amount and value of the manufactures of the State could be ascertained, the last General Assembly deemed it a duty to provide some remedial measures for the embarrassment often arising from ignorance of our resources as a State and people.

They therefore passed an act "to obtain statistical information in relation to certain branches of industry," by which it was provided that the Assessors of each town should between the first day of October, 1845, and the first day of the next succeeding April, make return to the Secretary of State, of certain facts as they existed in each city or town on said first day of October.

The Assessors were to be paid from the State Treasury for their services, and their accounts to be audited by a committee of the Legislature, and they were subjected to a penalty for wilful neglect to make return.

The Secretary of State was also directed to prepare and print an abstract from the returns of the Assessors for the use of the next Legislature.

In compliance with those directions the following abstract is submitted to the Hon. General Assembly.

The Legislature did not probably reflect upon the amount of labor to be performed in preparing the tabular arrangement directed by the Act, nor upon the time in which the same might be accomplished; as it will be perceived by an examination of the statute, that only one month intervenes between the time limited in which to make the returns to the Secretary and the Session of the Assem-

bly, at which the abstract is to be presented. That, is surely too brief a period in which to prepare and print the tables with that degree of arrangement, or accuracy of computation, which under other circumstances might have been attained. If, therefore, errors (it is believed there are none,) should be discovered, the haste with which the tables have necessarily been prepared, will, it is hoped be deemed a sufficient apology.

All the towns in the State, with a single exception, made returns. In some instances however, information was wholly refused the Assessors, and in others, partial statements only could be obtained; these facts will serve to explain many apparent discrepancies. For example—There are two Woolen Mills in Danbury, at which as appears by the returns, 14,480 yards of Satinet have been manufactured, and only 3000 lbs. of wool consumed. The cause of the great disproportion between the quantity of cloth manufactured, and wool consumed, is explained by the fact that the quantity of *cloth manufactured* at both Mills has been returned, while that of the *wool consumed* at one only has been reported.

The quantity of articles manufactured or produced has sometimes been returned without any valuation; and, on the other hand, in some cases, the value of articles has been returned without a statement of the quantity.

Some errors have been made by the Assessors, but as the directions in regard to the abstract appeared to authorize a compilation merely, but few alterations have been made. And as those errors (wherever they occur) are manifest, it is believed they will not mislead any one.

With the addition of Buckwheat, Beans, Broom-corn, Charcoal, Shingles, and a few others, the articles included in the tables are those specified in the Act. Had time permitted, other important articles manufactured would have had a place assigned them in the tables, but they now go to swell the column of miscellaneous articles, the items of which may be found under the town returns.

As the result would not be greatly varied thereby, fractions have been rejected in the tabular statement.

SECRETARY'S OFFICE,
May, A. D., 1846.

DAN'L. P. TYLER.
